

STATION ACTIVITY REPORTS

If you'd like to help us keep track of the formal messages handled in Wisconsin, you can file a Station Activity Report each month with the Section Traffic Manager. Such a report includes six numbers –

- the number of messages **originated** (that is, they are sent on behalf of a **third party** – someone not you),
- the number of messages **received**, on the air, from another station,
- the number of messages **sent** to another station, on the air, from your station,
- the number of messages **delivered** to someone not at your station,
- the number of deliveries **attempted** but unable to be delivered
- and the **total**.

We tally and publish these reports each month in the STM report. They're also forwarded to ARRL Headquarters so the communications department can get an idea of our activity, too.

Sample message text (check of 5) might look like this:

SAR APRIL ORSDAT 1/3/7/2/0/13 73
